

# Patio Heating Guide

## Prepare for cool temperatures with outdoor heating.

The Infrasave outdoor heating line utilizes radiant heat to warm people and objects, not the surrounding air, making it an ideal choice for open patio designs.

---

### IO-100 Series

### IO-200 Series

## Features

---

- Extend patio season and enjoy your outdoor space year-round.
- Flexible mounting options with an insulated cabinet means you can mount much closer.
- Color coating options allow heaters to blend seamlessly into the patio or outdoor environment.
- Limitless options for outdoor design applications.
- Schwank patent ceramic tile design provides high-intensity heat, with a quick ramp-up time and energy-efficient heat distribution.
